

MySQL for Oracle DBAs and Developers

Presented by

O'REILLY

**How can you tell an
Oracle DBA
has touched your
MySQL Installation?**

MYSQL_HOME=/home/oracle/products/mysql-version

mysqld_safe -user=oracle &

Outline

- DBA Tips, Tricks, Gotcha's & Tools
- Key Differences for Developers
- Migrating from Oracle to MySQL
- Questions & Answers

My Background

- 18 years in Database Technologies (1989)
- 10 years Oracle Experience (1996)
- 8 years MySQL Experience (1999)
- Active in MySQL, Java, XP User Groups
- Joined MySQL Professional Services (2006)

DBA

Important DBA Stuff

- Terminology
- Installation
- Directories
- Log Files
- Processes
- Ports & Sockets
- MySQL Data Dictionary
- Backup
- Tools
- Inherited LAMP Stack

Terminology

ORACLE

Database (files)	-->	Database Server Instance
Database Instance (memory)	-->	Database Server Instance
Schema User	-->	Database
User	-->	User
Table Space	-->	Table Space
	-->	Storage Engine

MySQL Installation

- OS packages place files in many areas and varies
 - e.g. /usr/lib, /var/lib, /var/log, /etc
- Recommend installing using .tar.gz
 - Centrally Manageable e.g. /opt/mysql-version
 - Upgradeable
 - Multiple Versions possible
- \$MYSQL_HOME

Tip

MySQL Configuration

GOTCHA

- Multiple MySQL Instances
- my.cnf
 - Watch out for /etc/my.cnf, /etc/mysql/my.cnf
 - Best Practice \$MYSQL_HOME/my.cnf
 - --defaults-file=<file>

<http://dev.mysql.com/doc/refman/5.1/en/option-files.html>

MySQL Directories

my.cnf options

- basedir (\$MYSQL_HOME)
 - e.g. /opt/mysql-5.1.16-beta-linux-i686-glib23
 - datadir (defaults to \$MYSQL_HOME/data)
 - tmpdir (important as mysql behaves unpredictability if full)
 - innodb_[...]_home_dir
- mysql> SHOW GLOBAL VARIABLES LIKE '%dir'

MySQL Ports & Sockets

- Configured to listen on TCP/IP Port (default 3306)
- Additional Instances
 - Different Ports
 - Different IP's using default Port
- Local connection uses Socket
 - Even specifying Port, local client may use socket

MySQL Log Files

- Error Log
 - log-error
- Binary Log
 - log-bin (my.cnf or mysqld arg)
- Slow Query Log
 - log-slow-queries,slow-query-time,log-queries-not-using-indexes
- General Log
 - log

my.cnf options
mysqld arg

<http://dev.mysql.com/doc/refman/5.0/en/log-files.html>

MySQL Meta Data

New Feature

- mysql Database
 - general_log, slow_log (5.1)

```
mysql> SET GLOBAL GENERAL_LOG=1;  
mysql> ...  
mysql> SELECT * FROM mysql.general_log;
```

<http://dev.mysql.com/doc/refman/5.1/en/log-tables.html>

MySQL Data Dictionary

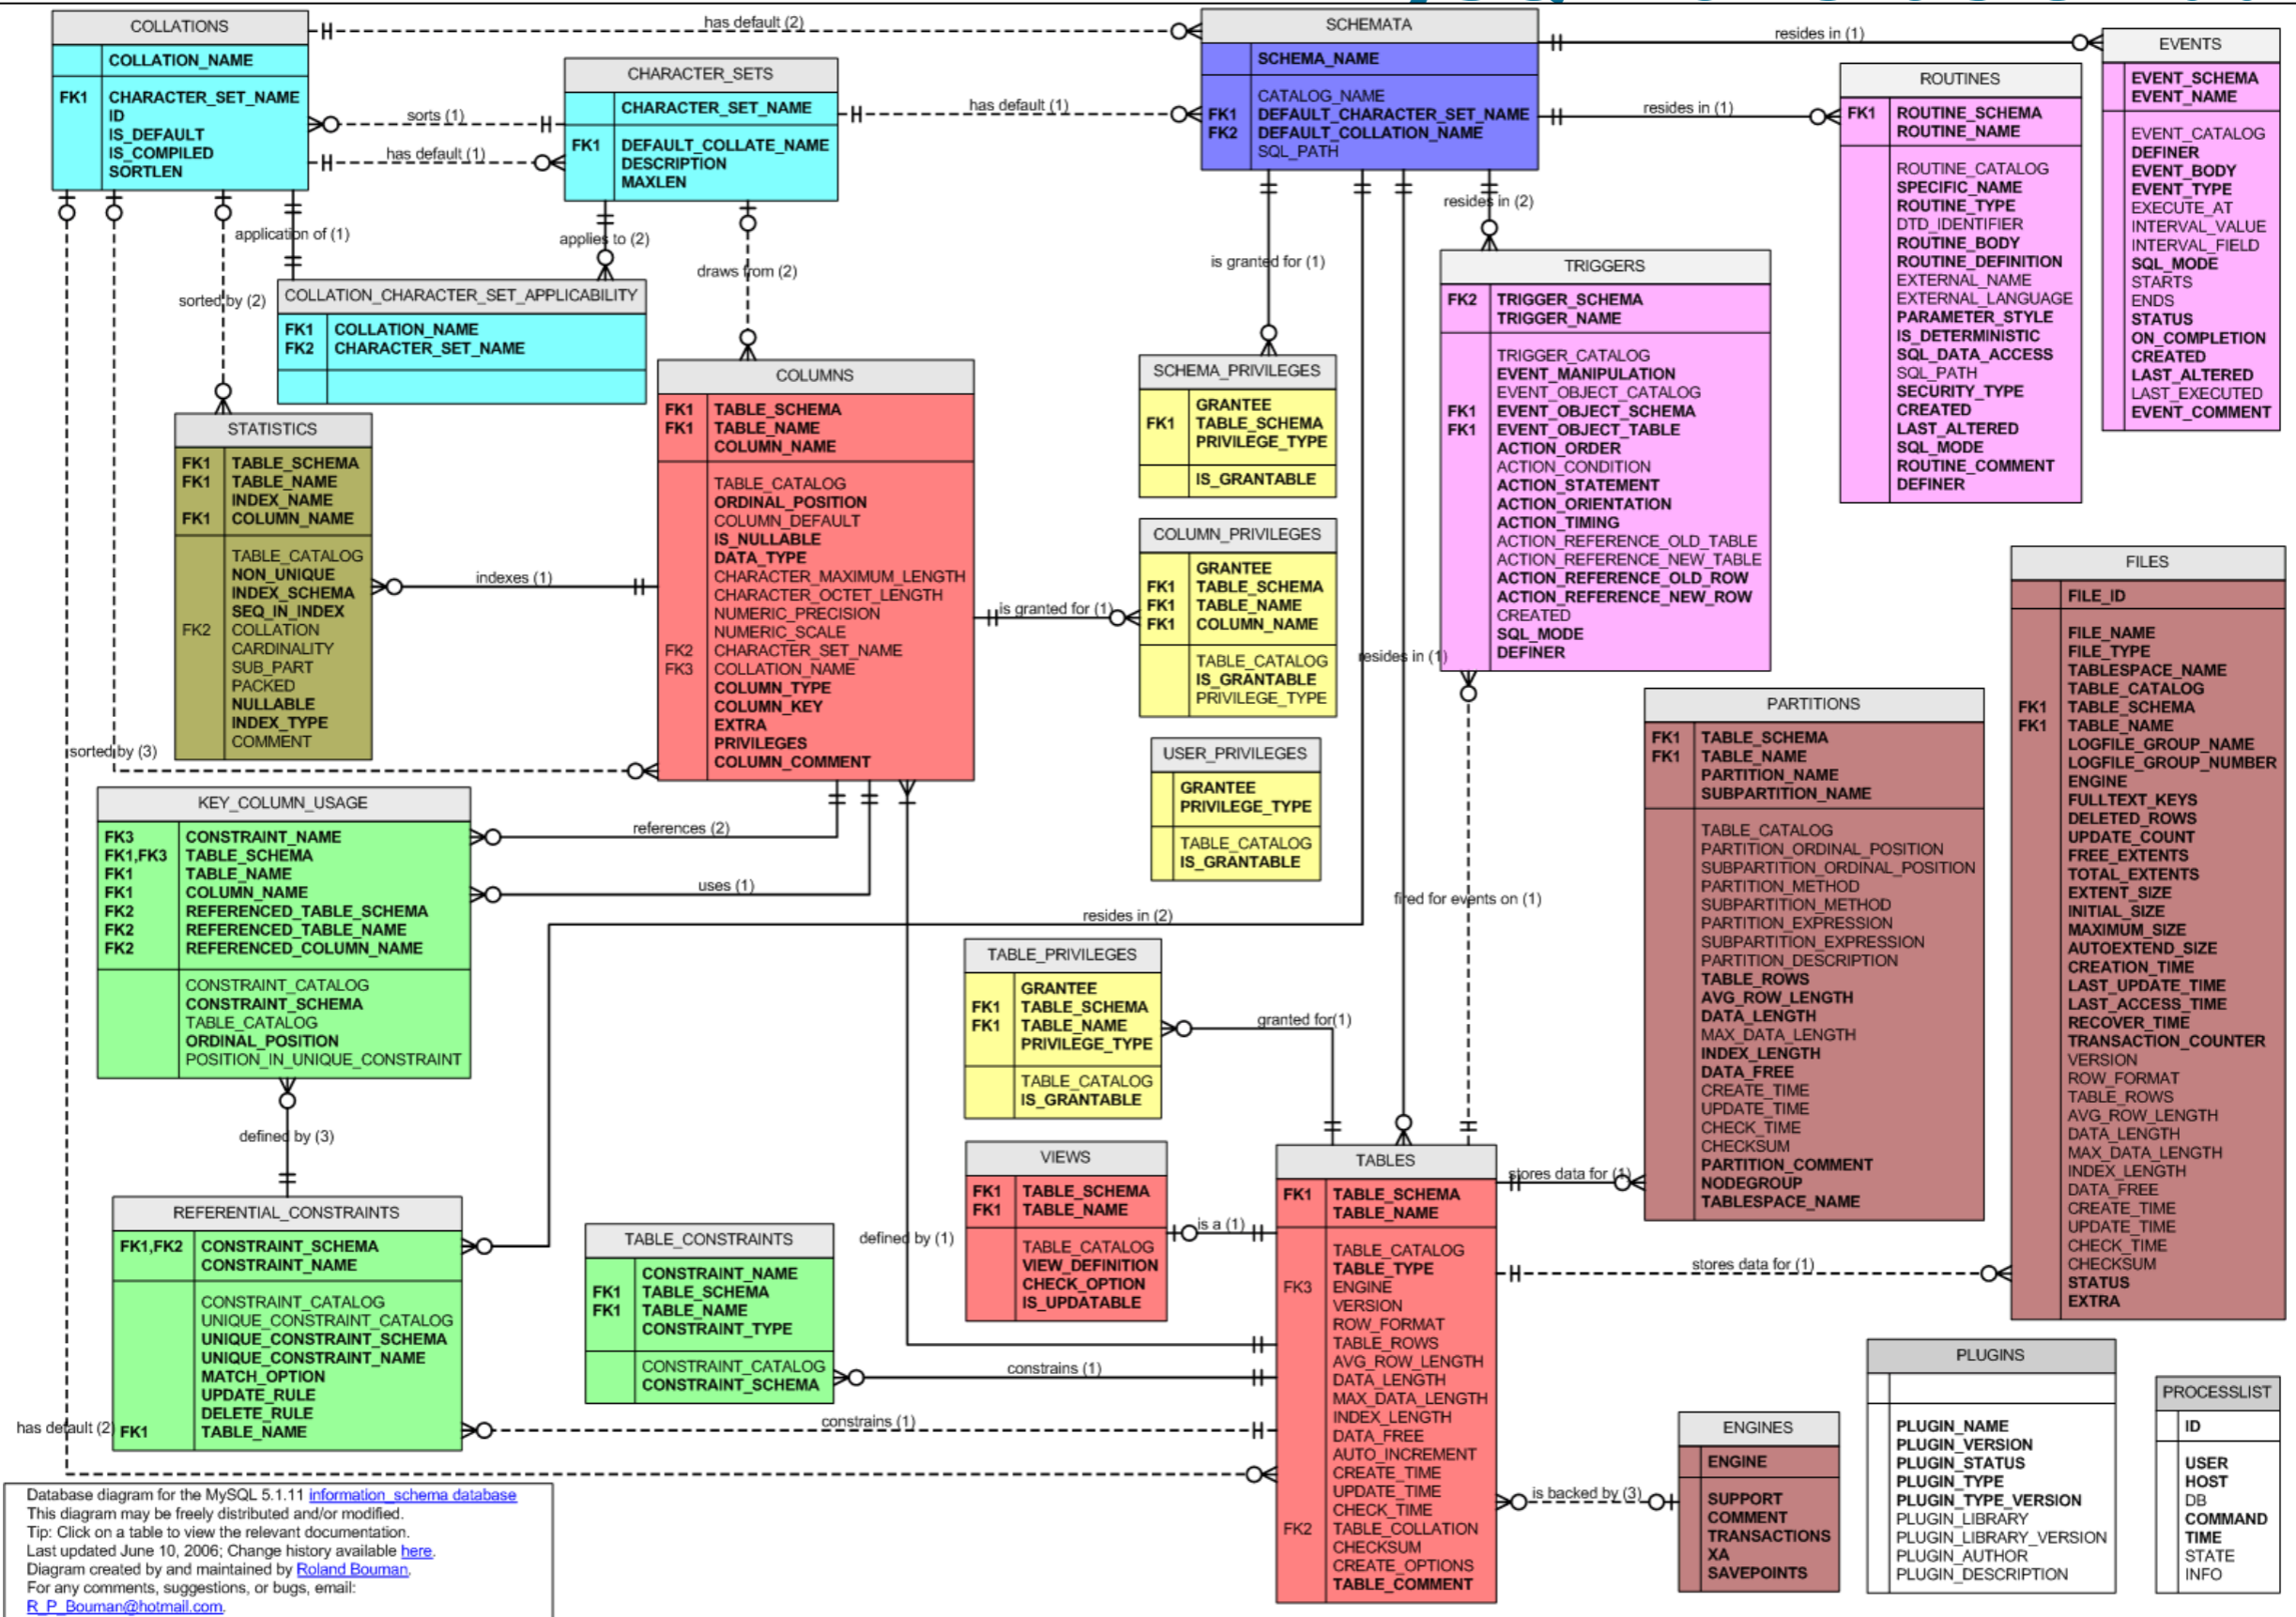

- INFORMATION_SCHEMA
 - TABLES, COLUMNS, VIEWS, USER_PRIVILEGES
 - PROCESSLIST (5.1)
 - [GLOBAL|SESSION]_[STATUS|VARIABLES] (5.1)

[DBA|USER|ALL]_tables, V\$

<http://dev.mysql.com/doc/refman/5.1/en/information-schema.html>

http://www.xcdsql.org/MySQL/information_schema/5.1/MySQL_5_1_INFORMATION_SCHEMA.html

MySQL for Oracle Dudes

Database diagram for the MySQL 5.1.11 [information schema database](#).
 This diagram may be freely distributed and/or modified.
 Tip: Click on a table to view the relevant documentation.
 Last updated June 10, 2006; Change history available [here](#).
 Diagram created by and maintained by [Roland Bouman](#).
 For any comments, suggestions, or bugs, email:
R.P.Bouman@hotmail.com.

MySQL Data Dictionary

■ SQL Examples

```
SELECT TABLE_SCHEMA, SUM((DATA_LENGTH + INDEX_LENGTH) / (1024 * 1024)) AS SIZE_MB  
FROM INFORMATION_SCHEMA.TABLES  
GROUP BY TABLE_SCHEMA ORDER BY SIZE_MB DESC
```

```
SELECT ROUTINE_TYPE, ROUTINE_NAME FROM INFORMATION_SCHEMA.ROUTINES  
WHERE ROUTINE_SCHEMA='dbname';
```

```
SELECT TRIGGER_NAME, EVENT_MANIPULATION, EVENT_OBJECT_TABLE,  
ACTION_STATEMENT  
FROM INFORMATION_SCHEMA.TRIGGERS WHERE TRIGGER_SCHEMA='dbname';
```

```
SELECT CONCAT('DROP TABLE ', table_name, ';')  
INTO OUTFILE '/sql/drop_tables.sql'  
FROM INFORMATION_SCHEMA.TABLES WHERE TABLE_SCHEMA = 'test';
```

MySQL Data Dictionary

■ SQL Examples

```
SELECT s.schema_name, CONCAT(IFNULL(ROUND((SUM(t.data_length)+
SUM(t.index_length))/1024/1024,2),0.00),'Mb') total_size,
CONCAT(IFNULL(ROUND(((SUM(t.data_length)+SUM(t.index_length))-
SUM(t.data_free))/1024/1024,2),0.00),'Mb')
data_used,CONCAT(IFNULL(ROUND(SUM(data_free)/1024/1024,2),0.00),'Mb') data_free,
IFNULL(ROUND((((SUM(t.data_length)+SUM(t.index_length))-
SUM(t.data_free))/((SUM(t.data_length)+SUM(t.index_length)))*100),2),0) pct_used,
COUNT(table_name) total_tables
FROM information_schema.schemata s
LEFT JOIN information_schema.tables t ON s.schema_name = t.table_schema
WHERE s.schema_name != 'information_schema'
GROUP BY s.schema_name ORDER BY pct_used DESC\G
```

SHOW Commands

- SHOW TABLES;
- SHOW WARNINGS;
- SHOW STATUS; FLUSH STATUS;
- SHOW VARIABLES;
- SHOW VARIABLES LIKE '%size%';
- SHOW VARIABLES LIKE 'sort_buffer_size';
- SHOW GLOBAL VARIABLES LIKE 'sort_buffer_size';

Backup

- Missing Functionality
 - ◆ Commercial strength – unbreakable (Planned 6.0)
- Storage Engine Driven
- Innodb
 - Hot Backup
 - mysqldump --single-transaction --master-data
 - InnoDB Hot Backup

Also PBXT, Falcon

Backup

- MyISAM Only
 - Cold Backup via File Copy
 - LVM Snapshot
- SE Mixture
 - Use Replication Slave

Online Backup/Recovery

MySQL 6.0 Demo

- Cross-engine. All major internal engines supported.
- Online, non-blocking for DML. DDL still blocked.
- SQL-command driven. Run from any mysql client.
- Backup to local disk, tape or remote file system.
- Full Server, database, and point-in-time recovery.

Tools

- Missing Functionality
 - Enterprise Level Monitoring
- SHOW PROFILE (5.0.38 - Community)
- Microsecond Patch (5.0.33 - Slow query granularity)
- mytop/innotop/ndbtop
- MySQL Toolkit <http://sourceforge.net/projects/mysqltoolkit>
- phpMyAdmin

SHOW PROFILE

```
mysql> show profile SOURCE,MEMORY for query 4;
```

Status	Duration	Source_function	Source_file	Source_line
Opening tables	0.00013200	open_tables	sql_base.cc	2106
System lock	0.00001800	mysql_lock_tables	lock.cc	153
Table lock	0.00000600	mysql_lock_tables	lock.cc	162
init	0.00001300	mysql_select	sql_select.cc	2073
optimizing	0.00004800	optimize	sql_select.cc	617
statistics	0.00002500	optimize	sql_select.cc	773
preparing	0.00005200	optimize	sql_select.cc	783
executing	0.00002200	exec	sql_select.cc	1407
Sending data	0.00000500	exec	sql_select.cc	1925
end	0.00786600	mysql_select	sql_select.cc	2118
query end	0.00001400	mysql_execute_command	sql_parse.cc	5085
freeing items	0.00000700	mysql_parse	sql_parse.cc	5973
closing tables	0.00001900	dispatch_command	sql_parse.cc	2120
logging slow query	0.00001000	log_slow_statement	sql_parse.cc	2178
cleaning up	0.00000500	dispatch_command	sql_parse.cc	2143

```
15 rows in set (0.01 sec)
```

- 95% time in one step
- Reference to Source Code
- “poor” Status names (internal code)

GUI Tools

- MySQL Administrator
- Quest Spotlight
- Toad
- MySQL Network Monitoring & Network Services

MySQL
Enterprise

Tools

TIP

- `mysqladmin -r -i 1 extended-status`
 - Gives change in status variables per second
 - Lacks timestamp
- Monitor specifics
 - `Com_*`
 - `Innodb_*`, `Innodb_buffer_pool_*`
 - Connections
 - `Created_tmp_*`

Tools

Example

- Idle
 - `$ mysqladmin -r -i 1 extended-status | grep -v " | 0 "`

Variable_name	Value
Bytes_received	35
Bytes_sent	6155
Com_show_status	1
Created_tmp_tables	1
Handler_read_rnd_next	246
Handler_write	245
Questions	1
Select_scan	1
Uptime	1

Tools

- Under load
 - `$ mysqladmin -r -i 1 extended-status | grep -v " | 0 "`

Variable_name	Value
Bytes_received	1020909
Bytes_sent	195358
Com_insert	274
Com_select	132
Com_set_option	264
Handler_read_key	505
Handler_update	252
Handler_write	519
Questions	1356
Table_locks_immediate	536
Table_locks_waited	2

Erroneous Commands
Causing Round Trips

Buried in JDBC Usage
PreparedStatement
.setMaxRows()

Inherited LAMP Stack Product

TIP

- Problem: Frozen, some functions work
 - Lack of Free Disk Space
- Problem: Running slow
 - Increase Buffers
 - Change Storage Engine
- Problem: Can't connect
 - Connections

Inherited LAMP Stack Product

- A lot of products are non-transactional
- Not designed for large volume enterprises

Default Installation

- No 'root' user password
 - Anonymous users mess with host based security
 - Improve overall security
- ```
$ mysql_secure_installation
```

GOTCHA

<http://dev.mysql.com/doc/refman/5.0/en/mysql-secure-installation.html>

# AUTO COMMIT

GOTCHA

- By Default enabled in MySQL
  - Ops I deleted the wrong data, I'll just ROLLBACK
  - Non Transactional Storage Engines
  - `SET AUTOCOMMIT = {0 | 1};`

# SQL\*Plus Reporting

- No Alternative
- Nice Feature- Vertical Output Display
  - SELECT columns FROM table \G
- Write your own in MySQL Source

# Nice MySQL Features

TIP

- SELECT INTO OUTFILE ...
- LOAD DATA FILE ...
- DROP [object] IF EXISTS ...
- ALTER TABLE .. ADD ... AFTER [column]
- Query Cache

# Query Cache

- SELECT Cache (great for high read environments)
  - Being Added to Oracle v11

<http://dev.mysql.com/doc/refman/5.0/en/query-cache.html>

## Contrasting Buffers

| Area                  | MySQL                                                                                                                                                                                                                     | Oracle                                                                                                                                                                    | Microsoft SQL Server                                                                                                                         |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|

# DEVELOPER

# Important Developer Stuff

- Sequence Replacement
- No DUAL Necessary
- Data Comparison
- DDL Syntax
- Stored Procedures
- Locking
- SQL\_MODE
- TIMESTAMP Data Type
- New things

# Sequences Replacement

## ■ AUTO\_INCREMENT

e.g. `id INT NOT NULL AUTO_INCREMENT,`

- Must be tied to a `[table].[column]`
- Only one per table
- No system wide capability
- `LAST_INSERT_ID()`
- No get next capability

# Optional Table Name

- DUAL IS NOT REQUIRED
  - e.g. `SELECT 1+1`
- Provided for Oracle Compatibility
  - e.g. `SELECT 1+1 FROM DUAL`
  - e.g. `SELECT DUMMY FROM DUAL` \*\*\* Fails

# Data Comparison

- LIKE compares data case-insensitive
    - Character Set/Collation dependent
- e.g. `SELECT title FROM film WHERE title LIKE 'A%'`
- Returns rows starting with 'ALIEN' and 'alien'
- BINARY DDL syntax
  - e.g. `title VARCHAR(100) NOT NULL BINARY`

# DDL Syntax

- Escaped Reserved Words are allowed  
e.g. `CREATE TABLE `group` (...);`  
e.g. `CREATE TABLE "insert" (...);` \* sql\_mode
- Tables/Columns/Triggers/Stored Procedures
- Space and other special characters allowed

Operating System Dependent

e.g. `CREATE TABLE `My Table Name` (...);`

# Stored Procedures

- Earlier Session
  - “Using Stored Routines for MySQL Administration”
- Not a PL/SQL Replacement
- Missing Functionality
  - ◆ Types, Overloading, named parameters, pinning, packages
  - ◆ Built-in Packages

# Stored Procedures

- MySQL Stored Routines Library
  - Globals
  - Arrays
  - Named Parameters

<http://forge.mysql.com/projects/view.php?id=35>

# Locking

- Storage Engine Specific
  - MyISAM/Memory – Table
  - InnoDB/Falcon/PBXT/Solid – Row
  - Nitro – quasi nothing

# SQL\_MODE

- SET SQL\_MODE=TRADITIONAL,ORACLE

<http://dev.mysql.com/doc/refman/5.1/en/server-sql-mode.html>

# SQL\_MODE

- String Concatenation
  - SELECT CONCAT('A','B');
  - SELECT CONCAT\_WS(',', 'a','b','c','d');

Emulate Oracle Behaviour

- SET sql\_mode='PIPES\_AS\_CONCAT';
  - SELECT 'A' || 'B';

May break other tools

# TIMESTAMP

TIP

- Remove DB level auditing via triggers
  - last\_modified TIMESTAMP ON UPDATE CREATE\_TIMESTAMP,

# New things you may see

- Multi-record INSERT
- REPLACE
- LOW\_PRIORITY | HIGH\_PRIORITY
- INSERT DELAYED

# MIGRATION

## Migration

```
MYSQL = (DESCRIPTION=
 (ADDRESS=(PROTOCOL=tcp)(HOST=localhost)(PORT=1521))
 (CONNECT_DATA=(SID=MYSQL)) (HS=OK))
```

```
CREATE DATABASE LINK mysql
 CONNECT TO "my_user" IDENTIFIED BY "my_password"
 USING 'mysql';
```

The Easy Way: Simply read/write  
directly to MySQL :)

# Oracle Migration

- Good guide to identifying differences
- Schema
- Data
- Objects
- Application

# Oracle Migration

- MySQL Migration Toolkit
  - Does
    - Tables/Views
    - Data
  - Does Not (yet)
    - Sequences
    - Stored Procedures
    - Triggers

<http://www.mysql.com/products/tools/migration-toolkit/>

# Oracle Migration - Schema

- Case Sensitive Table Names
- Data Types
  - INT, FLOAT/DOUBLE, NUMBER
  - UNSIGNED
  - BIT
- Sequences replacement – Auto Increment
- What's Missing
  - ◆ Snapshots, Check Constraints, Flashback queries, synonyms

NUMBER supports  
\* Integer  
\* Floating Point  
\* Fixed Point

# Oracle Migration - Data

- Date Format – no NLS\_DATE\_FORMAT
- Silent conversions
  - Less likely due to Oracle as Source
- No Oracle Timestamp (no ms support)
- Data Verification necessary
  - COUNT(), SUM(), MD5()

# Oracle Migration – Data Verification

- Numeric Precision/Rounding
- Character Sets (multi-byte data)
- CHAR usage
  - CHAR(5)
    - Oracle 'abc ' - 5 characters long
    - MySQL 'abc' - 3 characters long

# Oracle Migration - Objects

- No Packages
- Restricted Triggers
  - Only one trigger per table per DML statement
  - Missing
    - INSTEAD,
    - INSERT OR UPDATE
    - OR REPLACE
    - Only for DML Statements

# Oracle Migration - Application

- NVL() --> IFNULL()
- ROWNUM --> LIMIT
- SEQ.CURRVAL --> LAST\_INSERT\_ID()
- SEQ.NEXTVAL --> NULL
- NO DUAL necessary (SELECT NOW())
- NO DECODE() --> IF() CASE()
- JOIN (+) Syntax --> INNER|OUTER LEFT|RIGHT

# Oracle Migration - Application

- Date Functions
  - CURDATE(), NOW()
- Data Formats
  - Default is YYYY-MM-DD
- Case insensitive searching
  - no UPPER(column) = UPPER(value)
  - Character Set/Collation specific

# CLOSING

# Pronunciation

"MySQL" is officially pronounced as

"My Ess Queue Ell"
